**Meet your new,  
zero-power  
paperless solution  
for A2 posters.**

Paper A2 posters are  
now a thing of the past.  
The future of low-power  
digital signage displays  
is here. Sharp and E-Ink  
bring you the world's  
first electronic A2 poster  
solution.

## The first truly green A2 Poster solution on the market

### ZERO POWER

Spectra6 technology enables zero-power operation while maintaining an image.

### EARTH FRIENDLY

The electronic solution eliminates trips to the printer and reduces paper waste.

### LOW-COST OPERATION

Low power and eliminating printing expenses equals low-cost operation.

## Key Features

- Sharp's IGZO technology enables a narrow panel frame and improved design for multi-panel display.
- E Ink's latest e-paper module, "Spectra6," offers an expanded color gamut for vivid display quality.
- A thin and lightweight product enables easy hanging/installation.

\*Screen images shown are simulated pictures.  
Actual display will differ.
