H1

Say Goodbye to Paper Signage.

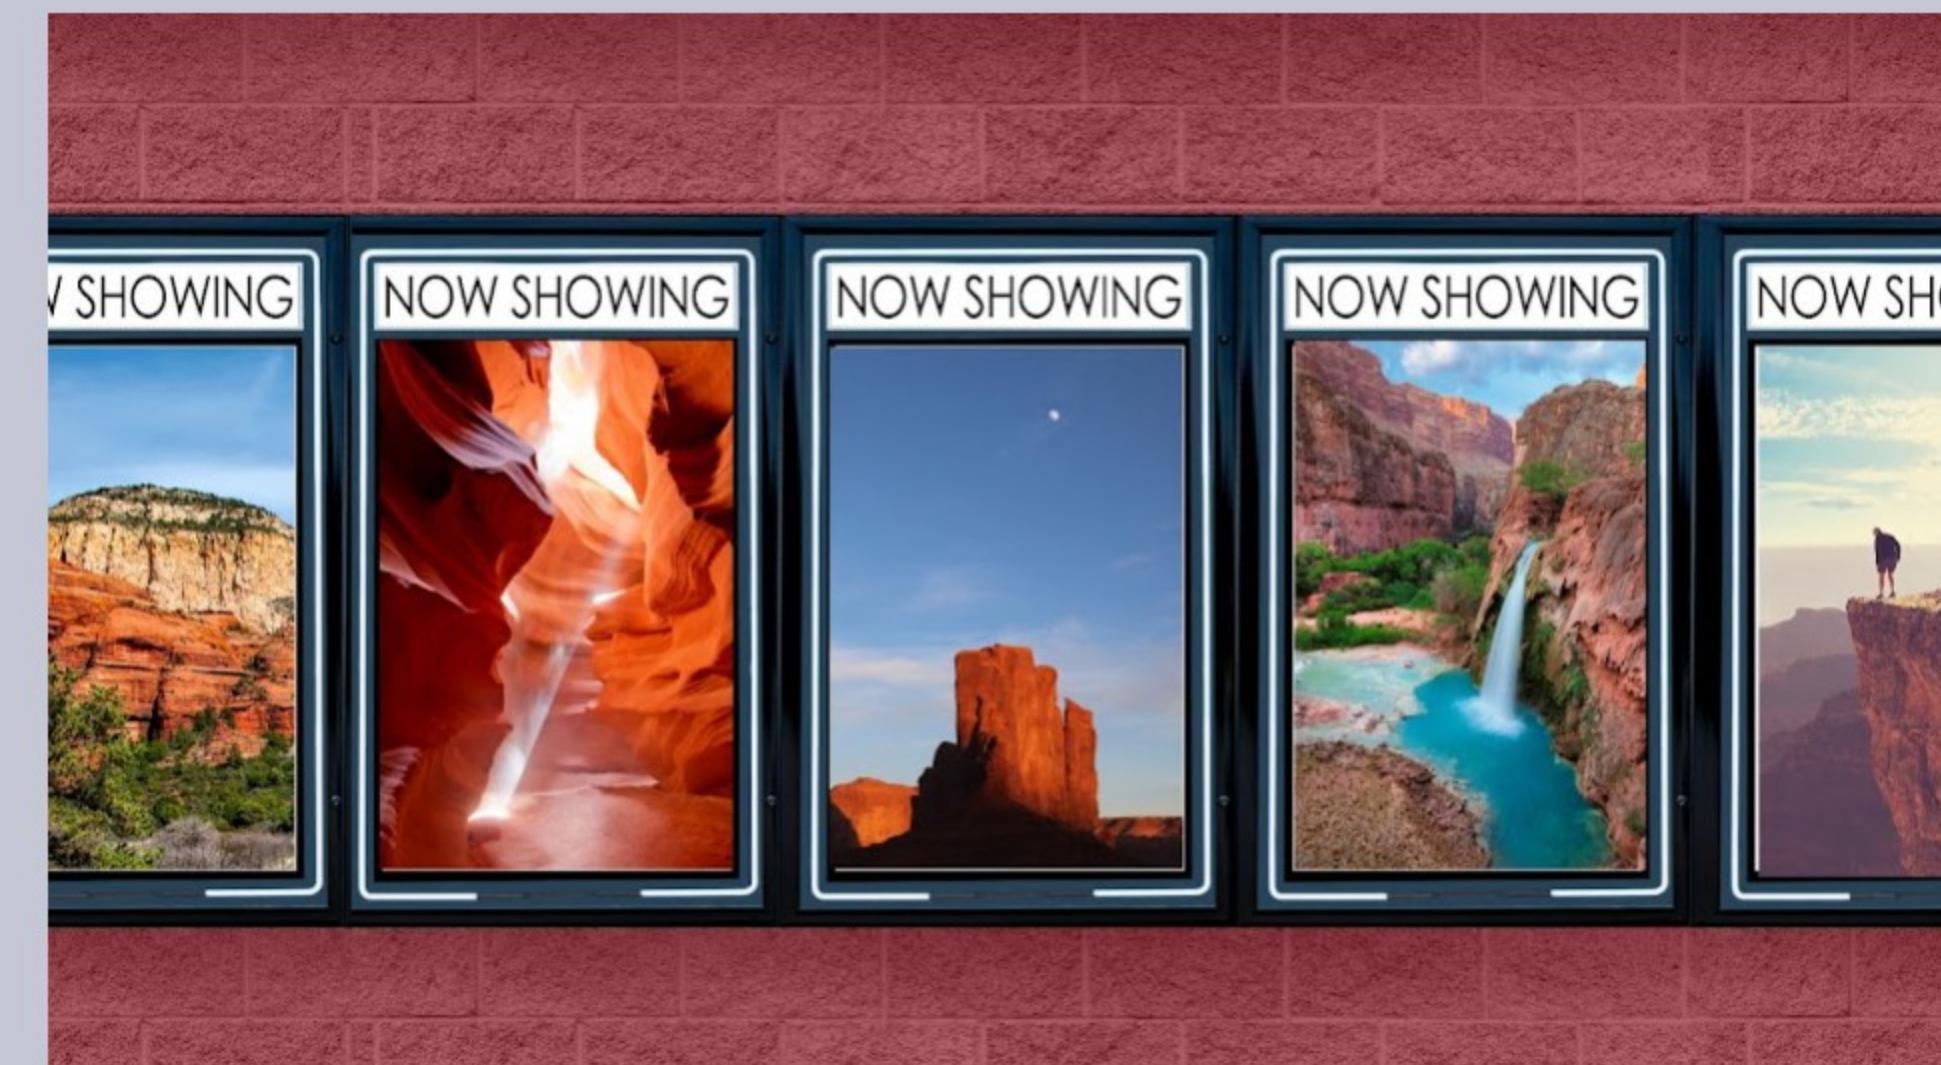

H2 Meet your new, zero-power paperless solution for A2 posters.

Paper A2 posters are now a thing of the past. The future of low-power digital signage displays is here. Sharp and E-Ink bring you the world's first electronic A2 poster solution.

Applications Include

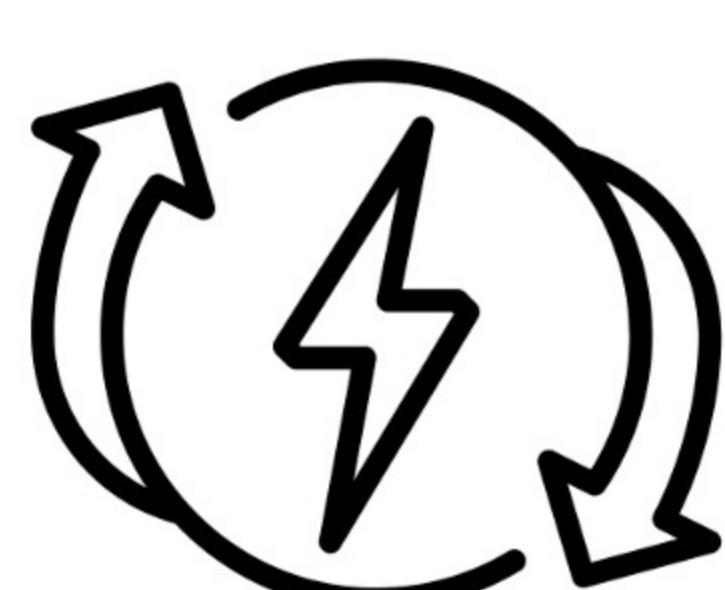

H2

- Transportation
- Cinema
- Retail Stores
- Public Buildings
- Wayfinding
- Lobbies
- Display Advertising
- And more

The first truly green A2 Poster solution on the market

H2

ZERO POWER

Spectra6 technology enables zero-power operation while maintaining an image.

EARTH FRIENDLY

The electronic solution eliminates trips to the printer and reduces paper waste.

LOW-COST OPERATION

Low power and eliminating printing expenses equals low-cost operation.

Key Features H2

- Sharp's IGZO technology enables a narrow panel frame and improved design for multi-panel display.
- E Ink's latest e-paper module, "Spectra6," offers an expanded color gamut for vivid display quality.
- A thin and lightweight product enables easy hanging/installation.

*Screen images shown are simulated pictures. Actual display will differ.

LET'S TALK ABOUT ZERO-POWER DISPLAYS FOR YOUR NEXT SIGNAGE PRODUCT DESIGN
